SCG NEWS

The Swiss Chemical Society is a Pool of Well Educated and Professionally Experienced People

Almost half of the working SCS members are active in academia, half in industry. This was revealed in a member survey undertaken recently.

Chemists typically enter the SCS when they are doctoral students or post-docs. Currently, every fifth SCS member (18%) is a student.

Only 3 percent of the working SCS members are self-employed. The remainder works at universities (44%), in industry (43%), in public administration (6%), as high school teachers (2%) or in NGOs (1%).

SCS members take a strong interest in research. This is reflected by the fact that every second SCS member (48%) is a member of the Division of Chemical Research. Every fourth SCS member (25%) is specially interested in medicinal chemistry, 22% in analytics, 12% in industrial chemistry (as a general field) and 10% in polymers.

SCS currently has 2531 members.

The survey was conducted between April and June 2009.

Call for Nominations for SCS Prizes 2010

SCS invites nominations to its scientific awards. SCS created a new chemistry teaching award, the Balmer Prize, which is also open to nominations. Nominations must be submitted by 15 October 2009.

Swiss Chemistry Community Ready for IYC 2011

The Swiss Chemical Society, the Platform Chemistry of the Swiss Academy of Sciences (SCNAT), and SGCI Chemie Pharma Schweiz extended an invitation to all organisations interested in making a contribution to the International Year of Chemistry (IYC) 2011. Roughly 60 organisations – universities, companies, museums and NGOs – responded, and 33 participated at the kick-off meeting in Bern.
