Bürgenstock Conference 2018

April 29 – May 3, 2018
Seehotel Waldstätterhof Brunnen
The ‘SCS Conference on Stereochemistry’, better known as ‘Bürgenstock Conference’, is an outstanding international chemistry meeting of high scientific quality, with an optimal setting for intense inter-disciplinary discussion.

Stereochemistry is the principle underlying our understanding of the processes of life and the properties of matter at the molecular level. It is a key element not only in all chemical disciplines, but also in modern molecular biology, molecular medicine, biophysics, and material design. Accordingly, the ‘Bürgenstock Conference’ has grown over the years into a multi-disciplinary conference where frontier science is being discussed. Lectures cover many areas of chemistry and relevant highlights from neighboring disciplines.

According to its long tradition, the 53rd Bürgenstock Conference 2018 will again be interdisciplinary, covering many areas of chemistry in its main body, but allowing also for relevant highlights from neighboring disciplines, with due focus on structural and mechanistic aspects in all contributions.

The program consists of 13 plenary lectures (60 minutes), each followed by a discussion session of 30 minutes. Thus, there will be ample time for each topic to be presented fully and examined from different angles and perspectives. Lectures and discussions are held in the mornings and the evenings. The afternoons are free for recreation, informal discussions, and poster sessions.

All participants, including invited lecturers and moderators, are expected to stay for the whole duration of the Conference.

Applications to participate

If you are...

- an established scientist in Chemistry, in the Life or Material Sciences in an academic institution or other non-profit organization, contact Prof. Cristina Nevado, University of Zurich (cristina.nevado.bc@chem.uzh.ch).
- an interested scientist in industry or another for-profit organization contact Dr. Guido Koch, Novartis (guido.koch@novartis.com). Note that industrial participation is in conjunction with a contribution by the company to the costs of the conference.
- a young scientist at the beginning or in the build-up phase of an academic career requesting financial support: see the JSP Program on the website.

Keine halben Sachen.

Die Welt ist voll von Halbwissen. Besonders im sensiblen Umfeld der Chemie ist dies jedoch fehl am Platz. Deshalb arbeiten wir seit 1947 mit Leidenschaft und Liebe zum Detail daran, dass evaluierte Daten und Fakten rund um das Themenfeld Chemie zur Verfügung stehen. Immer. Und ohne Ausnahme. So wurde „Der RÖMPP“ Synonym für inzwischen über 65 000 Stichwörter und über 240 000 Querverweise, auf die man sich verlassen kann. Das sollten Sie sich am besten selbst anschauen.
