In Memoriam: Professor Stanislaw Kostanecki (1860–1910)

Kostanecki

On the occasion of the 52nd Annual Meeting of the Polish Chemical Society, which was held in Lodz, Poland, on September 12–16, 2009, a celebration in memory of Professor **Stanislaw Kostanecki** was organized at the cemetery of the village Kazimierz near Lodz, where a commemorative plaque was unveiled. Stanislaw Kostanecki, born April 16, 1860, in Myskow, who spent almost all his scientific life in Switzerland, was a pioneer in the chemistry of flavonoids and dyestuffs. From 1890 to 1910, he was Professor for Theoretical and Organic Chemistry at the University of Bern.

He also served as the dean of the Faculty of Science in 1896/7 and was elected president of the Swiss Chemical Society 1909/10. The focus of his scientific work was the chemistry of plant dyes, and his synthesis of chromones (Kostanecki acylation, Kostanecki-Robinson reaction) is content of textbooks in organic chemistry. Among his Ph.D. students was *Kazimierz Funk*, who was promoted in 1904. Later on, as a famous biochemist, he created the term 'vitamine'.

The time of Stanislaw Kostanecki was not only a great time for chemistry in Switzerland but also for Polish scientists in our country: *Marcel von Nencki* was Professor for Medicinal Chemistry and Bacteriology at the University of Bern (1872–1891), *Augustin Bistrzycki*, Professor for Organic and Analytical Chemistry at the University of Fribourg (1896–1932), *Anton von Kostanecki*, the youngest brother of Stanislaw, was Professor for Economy at the same University (1901–1910), and *Bernard Napieralsky*, who discovered the Bischler-Napieralski reaction together with his teacher, was promoted to Ph.D. at the University of Zürich in 1893.

The third of the Kostanecki brothers, Kazimierz, was Professor for Anatomy at the University of Krakow (1894–1935). The high-school of Zagórów (Zespół Szkół Ponadgimnazjalnych im Braci Kostaneckiego), located near the birthplace of Stanislaw Kostanecki, is named after the three brothers, who all were outstanding scientists working in Switzerland and Poland.

SCS Prize Laureates

The SCS Board has elected its prize laureates for 2010. The prestigious Paracelsus Prize (CHF 20,000 and medal in gold) is conferred on **Steven V. Ley** from the University of Cambridge (UK).

The Werner Prize 2010, awarded to a promising young scientist for outstanding independent chemical research, goes to MER Dr. **Sandrine Gerber** from EPFL in Lausanne.

The Sandmeyer Prize, awarded for outstanding work in industrial or applied chemistry, goes to **Markus Eyholzer, Michael Gottsponer, Norbert Kockmann** and **Dominique Roberge** from Lonza.

The Grammaticakis-Neumann Prize, awarded for outstanding independent research in photochemistry, photophysics or molecular photobiology, is awarded to Prof. **Sivaguru Jayaraman** from North Dakota State University (USA).

The Dr. Max Lüthi Award is conferred on **Benjamin Otter** (Fachhochschule Nordwestschweiz) for his diploma work 'Entwicklung einer Anlage für visuelles online Monitoring von Kristallisierungsprozessen'.

The Balmer Prize, awarded to teachers at high school (Gymnasium) level for innovation in chemistry teaching, goes to **Roger Deuber** and Dr. **Juraj Lipscher** from Kantonsschule Baden. Deuber adapted known methods for producing cyanotype photography with nontoxic materials and visible light. Lipscher developed new ways of linking art and chemistry.

The SCS Medal – awarded for the first time – is conferred on **Maurice Cosandey** for his lifelong efforts in promoting high quality standards in chemistry teaching and encouraging the young generation to study chemistry. He also facilitated contacts between secondary teaching and academia.

EVENTS

Innovationstag Naturwissenschaftlich-technischer Unterricht

March 6, 2010, Hochschule für Technik, Windisch
 Ein Weiterbildungstag mit einem breiten Angebot: 24 Ateliers, 15 Vorträge, 18 Marktstände von Buchverlagen, Lehrmittelfirmen, Museen und Vereinigungen. Der Anlass wird gemeinsam organisiert von fünf Pädagogischen Hochschulen sowie weiteren Bildungseinrichtungen. Angesprochen sind Lehrpersonen aus Kindergarten, der Primar- und Sekundarstufe I sowie interessierte Lehrpersonen der Sekundarstufe II.
 Tagungsbeitrag inkl. Verpflegung: CHF 140.- (Studierende CHF 50.-).

Second NanoImpactNet Conference

March 10–12, 2010, Lausanne, CHUV
 E-mail: darren.hart@hospvd.ch
http://www.nanoimpactnet.eu/object_binary/o3051_Programme_NanoImpactNet_Conf2010.pdf

EuCheMS European Energy Conference

April 19–23, 2010, Barcelona, Spain

EuCheMS is working in partnership with the European Physical Society, the European Materials Research Society and the European Science Foundation to launch a European Energy Conference, with the aim of bringing a new dimension to energy research. The first conference will be held in Barcelona, Spain, in 2010.

Frontiers of Chemistry: From Molecules to Systems

May 21, 2010, Paris, France

A celebratory one-day symposium on the occasion of the 10th anniversary of ChemBioChem and ChemPhysChem, European journals of chemical biology and physical chemistry/chemical physics at the Maison de la Chimie in Paris.

Posters are welcome and will be displayed online as from 5th April.

LECTURES**Berner Chemische Gesellschaft**

Hörsaal EG 16, Departement für Chemie und Biochemie,
Freiestrasse 3, CH-3012 Bern

Mittwochs, 16.30 h

Kaffee um 16.10 Uhr vor dem Hörsaal

- 10.3.2010 Prof. Dr. J. Mesot
PSI, Villigen
'Materials Research at PSI Large Scale Facilities'

- 24.3.2010 Prof. Dr. Alfons Baiker
ETH Zürich
'Catalysis on Chiral Surfaces'

Société Chimique de Genève

UNI Sciences II – Amphithéâtre A 150, 30, Quai E. Ansermet,
Genève

Lundi, 17.30 h

- 1.3.2010 Prof. Eric Davaud
Département de Géologie et de
Paléontologie, Université de Genève

'Les climats et les variations du niveau marin du passé: Quels enseignements pour l'avenir ?'

29.3.2010

Prof. Gisou van der Goot

School of Life Sciences, EPFL, Lausanne
'Anthrax Toxin Receptors: Roles in Infectious and Genetic Diseases'**Departement Chemie der Universität Basel
Anorganische und Organische Chemie**

Departement Chemie, Universität Basel, kleiner Hörsaal,
Organische Chemie, St. Johanns-Ring 19, CH-4056 Basel

5.3.2010

Freitag

14.00 h

Prof. Dr. Dario Braga

Universita di Bologna, Bologna, I
'Networks with Molecular Ions and Coordination Compounds'

11.3.2010

Donnerstag

17.30 h

Vortrag der Basler Chemischen Gesellschaft

Prof. Dr. Herbert Mayr

LMU München, D

'Mythology in Organic Chemistry:
A Kinetic Analysis'

15.3.2010

Montag

10.45 h

Prof. Dr. Takashi Hayashi

Dep. of Applied Chemistry,
Osaka University, Japan
'Heme-substitution
Method is Attractive for
Creating New Hemoproteins
in Materials'

19.3.2010

Freitag

10.45 h

Dr. Daniel Werz

Universität Göttingen, D
'Modification of Carbohydrates: From
Three-Membered Ring Chemistry to
Pd-Mediated Reactions'

25.3.2010

Donnerstag

17.30 h

Vortrag der Basler Chemischen Gesellschaft

Dr. Roman Kaiser

Givaudan, Dübendorf

'The Scent of the Vanishing Flora: New and
Uncommon Volatile Compounds in Most
Diverse Endangered Plant Species'**Departement Pharmazeutische Wissenschaften
der Universität Basel**

Lecture Hall 1, Pharmazentrum, Klingelbergstrasse 50,
CH-4051 Basel
Mittwochs, 17.00 h
